ePortfolios: Managing learner information in the Vocational Education and Training (VET) sector

Ms Allison Miller
Australian Flexible Learning Framework

Abstract:
The Australian Flexible Learning Framework’s E-portfolios Business Activity (www.flexiblelearning.net.au/e-portfolios) aims to establish national agreement on the standards requirements for e-portfolios to ensure portability of information which supports transitioning between training and other forms of education, between jurisdictions, and between employers and industries for the Vocational Education and Training (VET) sector. Allison will share the key outcomes of the research and e-portfolios activities from 2008, and the foci for 2009 and beyond.
