Australian ePortfolio Symposium
7 - 8 February 2008

researching ePortfolios in education, employment + community
Group Enquiry
Interoperability

• Identifying strategies for implementation/pilots
• Portability of ePortfolios
  – Set of relationships between data
  – Decisions about what will be transferred -> individual control is vital
  – Level of granularity for ePortfolio components
  – Semantics and mapping of semantics -> this needs to also include policy makers
• Developing vocabularies/shared languages/ontologies for ePortfolios
  – Relationships, mapping between communities
• Participating in the IMS ePortfolio initiative
