Asia-Pacific research

The Griffith Institute for the Environment is working to help Australia’s environment by providing more information about the Asia-Pacific region. The research program will focus on improving environmental management, trade and development, as well as understanding the links between the two regions.

Alexander Symonds

Environmental study

The study will also examine the environmental effects on our health, and the program will work to provide a healthy environment for the health of the Australian community.

The university will be the centre of the study and the centre will work to provide a healthy environment for the health of the Australian community.

Rachel Lashin

Chinese medical centre

The University of Sydney will establish a medical centre in Sydney, which will be the first of its kind in Australia. The university will work to provide a healthy environment for the health of the Australian community.

Luisa Meador

Water project award

The project will also examine the environmental impact on the environment and the government will work to provide a healthy environment for the health of the Australian community.

Alexandra Symonds

Time to polish up the career ePortfolio

Students are being offered a chance to look good for graduate employers.

Erin Corwin

University is finding new ways to help students develop and keep an up-to-date record of their skills.
